

The world has just 12 years to avert climate catastrophe warns a UN report backed by over 6,000 scientists around the globe.*

Around the world, young people are organizing to ensure a future that is livable for everyone. One of the biggest #ClimateEmergency mobilizations will be in New York City ahead of the UN's Climate Action Summit on September 23rd where world leaders will meet to discuss strategies to avert climate disaster.

The young people are asking adults to support their march in NYC to demand transformative action! We live under one sky, one planet and breathe the same air.

It is time to take action for our collective survival!

We know what's at stake. On the same day—September 20th—just two years ago, hundreds of 1199 member's families were battered by Hurricane Maria when it struck Puerto Rico, causing massive devastation. And in 2012 Hurricane Sandy battered New York and we are still feeling the effects.

Let's make our voices heard! Bring your children and grandchildren!
